A part-time student of the preschool education department at Urgench

State University and a teacher at the Multidisciplinary Specialized

Preschool Educational Organization No. 9 in Gurlan district

Abstract: preschool education is an important stage in the initial development of children, and its effective management directly impacts the quality of education. Additionally, information will be provided about the goals, functions, and methods of preschool educational institutions.

Key words: preschool education, management principles, improving educational quality, development, pedagogical methods, educational institutions, innovative approaches.

Annotatsiya: maktabgacha ta'lim, bolalarning dastlabki rivojlanishi uchun muhim bosqich bo'lib, uning samarali boshqaruvi ta'lim sifatiga bevosita ta'sir ko'rsatadi. Shuningdek, maktabgacha ta'lim muassasalarining maqsadlari, funksiyalari va uslublari haqida ham ma'lumotlar beriladi.

Kalit so'zlar: maktabgacha ta'lim, boshqaruv tamoyillari, ta'lim sifatini oshirish, rivojlanish, pedagogik uslublari, ta'lim muassasalari, innovatsion yondashuvlar.

Аннотация: дошкольное образование является важным этапом начального развития детей, а его эффективное управление непосредственно влияет на качество образования. Также будет представлена информация о целях, функциях и методах дошкольных образовательных учреждений.

Ключевые слова: дошкольное образование, принципы управления, повышение качества образования, развитие, педагогические методы, образовательные учреждения, инновационные подходы.

Improving the management principles in modern preschool educational institutions and developing linguistic competence directly impacts the qualified performance of teachers and the overall development of children. Enhancing teachers' qualifications and renewing pedagogical approaches are crucial for effective communication with children and guiding them towards linguistic competence. Linguistic competence is essential for children to express their thoughts accurately, develop communicative skills, and succeed in the overall educational process. The interrelation between the improvement of management principles and linguistic competence is significant. Enhancing management principles in preschool institutions increases the effectiveness of overall management processes. The importance of linguistic competence in the management process is substantial. It allows teachers to establish proper and effective communication with children, listen to their opinions, express their own thoughts clearly, and

foster the development of social skills.

Limited opportunities for teacher training: the number of professional development courses and training available for teachers is limited, which causes difficulties in applying modern methods in their teaching practices. Obsolescence of pedagogical methods. Many preschool educational institutions are using outdated pedagogical methods, and there are challenges in implementing new methods and technologies. Lack of resources. There is a shortage of necessary pedagogical resources, methodological guidelines, and technical tools in preschool education institutions.

1. Improving the teacher training system: Special training sessions and courses should be organized to enhance the qualifications of preschool educators. These trainings should focus on modern pedagogical methods and developing linguistic competence.
2. Updating pedagogical approaches and methods: Teachers should be introduced to new pedagogical methods, technologies, and interactive approaches. These pedagogical reforms will ensure effective teaching and communication with children.
3. Improving infrastructure and resources: It is essential to ensure the availability of necessary infrastructure and pedagogical resources in preschool educational institutions. Materials, didactic guidelines, technical tools, and educational resources that aid in the development of linguistic competence should be adequately provided to teachers.

Improving management principles will yield results in reforms within the educational system. In Shavkat Mirziyoyev's concept for the development of the preschool education system in the Republic of Uzbekistan until 2030, it is emphasized that "conditions should be created for the comprehensive intellectual, moral, aesthetic, and physical development of preschool-aged children, and innovations, advanced pedagogical and information-communication technologies should be introduced into the preschool education system." This concept has become an important step in enhancing the tools and methods for developing preschool education and shaping the linguistic competence of children in preschool educational institutions. Preschool educational institutions serve as a crucial foundation for the initial education and upbringing of children. The importance of preschool education is increasing in modern society, leading to the need for updated management practices. The principles of management in preschool educational institutions play a vital role in enhancing their effectiveness, improving educational quality, and ensuring the development of children. One of the key principles is democratic management, which allows for the inclusion of all staff members' opinions and participation in the decision making process. This principle fosters collaboration among staff and improves the social environment within the institution. Every child has unique characteristics. The principle of individualized approach in preschool educational institutions ensures that the individual needs of children are taken into account. This principle assists educators in developing children's abilities. Modern preschool educational institutions should strive to renew the educational process by applying innovative approaches. This includes introducing new pedagogical technologies, improving teaching methods, and employing contemporary methods in working with children. The principle of quality management requires continuous monitoring of the educational process's quality and implementing measures to improve it. This principle is aimed at enhancing the

effectiveness of pedagogical activities. Preschool educational institutions can further enhance their effectiveness by collaborating with parents, the community, and other organizations. Parental involvement positively impacts children's development.

In modern preschool educational institutions, management principles are crucial for enhancing children's development and improving educational quality. The principles of democratic management, individualized approach, innovative management, quality management, and collaboration contribute to the effective organization of the educational process. Improving management in the field of preschool education is a key factor in ensuring that future generations receive quality education.
