Keywords: information and communication technology, pronunciation, language learning, pedagogical experience, "Pantomime", "Story Chain", "Collection of Scholars", "Pictures Speaking".

Introduction:

After the independence of our country, the interest in teaching foreign languages has grown and many opportunities have been created for young people. As the first President Islam Karimov said, "At present, great importance is attached to the teaching of foreign languages in our country. This, of course, is not in vain. There is no need to underestimate the importance of perfect knowledge of foreign languages for our countries, which today are striving to take their rightful place in the world community, for our people, who are building their great future in cooperation with our foreign partners.

Today, foreign language skills are becoming an integral part of vocational education. Specialists in various fields have a high level of cooperation with foreign partners, so they have a high demand for language learning. In modern society, foreign languages are becoming an important part of vocational education. Such knowledge is first acquired by people in schools, colleges, high schools, and later in institutes, training courses, or by familiarizing themselves with basic information sets that help them learn a foreign language independently. Today there is a large collection of teaching materials for people with different levels of language skills. New methods and requirements for foreign language teaching in the country have been developed in accordance with the Recommendations of the European Framework for Assessment of Knowledge and Skills of Foreign Language Teachers (CEFR). According to him, textbooks have been created for students of secondary schools and vocational colleges.

The demand for learning a foreign language is growing day by day. Foreign language science is divided into four aspects (reading, reading, listening comprehension and speaking), each of which provides specific concepts and skills. Educational technology is the effective use of modern information technology in the educational process. It also aims to improve the quality and effectiveness of education through the introduction of modern innovative technologies in the educational process. In particular, there are several advantages to using such information and communication technologies in learning a foreign language.

The role of modern technology in language learning and teaching is invaluable. The use of technology is useful in every aspect of learning a foreign language (reading, reading, listening and speaking). For example, to listen and understand, of course, it is impossible to do this process without a computer, player, CDs. Listening is one of the most important parts of language learning.

An important factor in the use of modern technologies in education is the ability of students to know and use information and communication technologies. Teaching and learning a foreign language using modern technology is one of the most effective ways. In this process, including: - when using computers, the student can watch and hear videos, demonstrations, dialogues, movies or cartoons in a foreign language; - It is possible to listen and watch radio broadcasts in foreign languages and TV programs; - use of tape recorders and cassettes, which are more traditional methods; - CD players are available.

The use of these tools will make the process of learning a foreign language more interesting and effective for students. Today, interactive games are becoming a tradition in schools. It is well known that a variety of games help students demonstrate their abilities, focus, increase their knowledge and skills, and become stronger. The basics of using gaming technology are an activity that activates and accelerates the learner. According to psychologists, the psychological mechanisms of playful activity are based on the fundamental needs of the individual to express themselves, to find a stable place in life, to self-manage, to realize their potential.²

Today, English teachers use the following innovative methods, based on the experience of educators in the United States and the United States: - "Creative Problem Solving" To use this method, the beginning of the story is read and how it ends. students are referred to the judgment of the students; - Merry Riddles is an important part of teaching English to students, as they learn words they are unfamiliar with and find the answer to a riddle; - Quick answers help to increase the effectiveness of the lesson; - "Warm-up exercises" - the use of various games in the classroom to engage students in the lesson - "Pantomime" (pantomime) This method is used in a lesson or written exercise where very difficult topics need to be explained to students. can be used when tired.

The use of these tools will make the process of learning a foreign language more interesting and effective for students. Today, interactive games are becoming a tradition in schools. It is well known that a variety of games help students demonstrate their abilities, focus, increase their knowledge and skills, and become stronger.

Focusing on more interactive methods will increase the effectiveness of education. One of the most important requirements for English lessons is to teach students to think independently. In addition to this, English teachers use this method, the beginning of the story is read and how it ends. Students are referred to the judgment of the students; - Merry Riddles is an important part of teaching English to students, as they learn words they are unfamiliar with and find the answer to a riddle; - Quick answers help to increase the effectiveness of the lesson.

In short, the use of innovative methods in English lessons develops students' logical thinking skills, fluency, and the ability to respond quickly and correctly. Such methods stimulate the student's desire for knowledge. The student strives to prepare well for the lessons. This makes

students active participants in the learning process. As the education system sets itself the task of nurturing a free-thinking, well-rounded, mature person, in the future we will contribute to the further development of effective ways for future teachers to effectively use innovative technologies.
