**Abstract:** This article is about economic It discusses the role of the state in combating the crisis and the state's strategies for long-term economic growth and development.

**Keywords:** Economic, property, citizen, crisis, strategy, investment, inflation, credit, entrepreneur.

**Introduction:** Economic crises are a serious test for any state. Crises arise mainly as a result of systemic errors in the economy, external factors or internal negative changes. They threaten the economic stability of the country, social peace and the well-being of citizens. Therefore, the role of the state in combating the crisis is very important. The state, through its economic policies and financial mechanisms, seeks to reduce the negative impact of the crisis, restore economic stability and protect citizens.

**Main part:** Economic crisis of the state all to the fields negative impact indicating complex and systematic process. It is in the economy to the surface arrived turmoil, investment problems, inflation, unemployment and others negative situations own inside takes. For this reason, in 2017-2021, Uzbekistan Republic Beshear's development priorities direction according to Actions in the strategy Uzbekistan economy organization development and growth important directions marked. Uzbekistan president the economy organization to do this important directions to life implementation to do, from them expected The results are based on the results of the Higher Education Commission elections held on December 12, 2017, December 28, 2018, and January 24, 2020. To the meeting In their petitions in detail stopped passed. Designed for 2022-2026 Progress Strategy III - " National the economy intense development and high growth pace ", which includes 16 goals and their to perform tasks was marked. From now on except, Uzbekistan Chapter XII of the Constitution " The Society " economic " The basics " and it contains Uzbekistan economy market to their relationship reliance and of the economy clear basics by designating " Citizens " well-being to increase aimed at Uzbekistan of the economy basically diverse in forms property organization State market their relationship development and honesty competition for conditions creates, consumers rights priority into account received without economic activity, entrepreneurship and labor to do freedom guarantees.

Economic crisis during of the state central banking and finance system main role plays. Central bank inflation level control to make, currency courses stabilization and credit policy order to put through economic stability to provide The state seeks to reduce taxes. reduce or subsidy separation such as measures and population for additional help is economic activity

supports. Crisis during population marriage of well-being decline and unemployment increase to the eye State social help programs working output, labor market restoration and new work their places create for responsible is considered. This not only people marriage level support, maybe economic to restore activity help The state unemployment reduce according to dun increased efforts people social protection provides and contributes to the economy again recovery

Economic from the crisis exit for, state investments attraction to do strengthen necessary. Here state his/her own economic strategy change, new technologies and high effective working release systems current to be able International investors to the country attraction to do for investment conditions improvement, legal and financial security It is required to provide. The state invests attraction to do through the economy to develop, new work their places create and export opportunities to expand achieves. States between international cooperation and assistance show the system is also very important. States mutual trade and investment exchange, technologies learning and experience exchange through to the crisis against in the fight effective to the results International finance institutions, including the International currency Fund (IMF) and the World Bank such as organizations, countries necessary financial help display and economic from the crisis on the way-out support offer to do This is possible. to the state his/her own economic stability recovery and long-term growth pace provide opportunity gives.

**Conclusion:** Economic to the crisis against in the fight of the state role important. The state is effective. financial politics, investments attraction to do, social help system, international cooperation and economic reforms through economic stability to provide strives. So crisis during of the state fast and own on time measures vision economic recovery and long-term stable development the foundation creates.
