Abstract: This in the article In Uzbekistan village in places population marriage well-being improve and population work employment with to provide main priority goal directions is placed . Current time on demand mainly this village in places new enterprises organization to grow through done fast is being increased . Village in places modern life with connected , modern techniques , technologies and modern enterprises build to grow enters .

Key words: village population work with employment , modern technologies , population marriage well-being , social - economic processes .

Our country economy under the circumstances village in places population busyness increasing measures working exit , country economic in development important role plays . Village in places population marriage well-being increase and employment provide of the country socio-economic in development important importance has .

Today on the day in our country , especially its village in the regions population work with in providing own practical solution waiting There are many problems . For this purpose achieve for one row social and economic events done increase necessary . Village farm modernization to do , village economy diversification to do , education and qualification increase , village population for profession to teach and qualification increase programs development , youth and women to work placement such as measure events application important become is considered .

Economic progress and human potential in development population work with employment important factor is considered .

Village in places competitive products cultivation and modern enterprises organization to grow for first of all , knowledgeable , experienced experts our preparation necessary , because current on the day modern techniques century It is considered , because our youth this developed technician in the time of all technologies to use their studies They need to . qualified employee as formation for edge state to practice and experienced experts in hand education to take on the road to put main task is considered .

In this regard Our President Sh. Mirziyoyev also emphasizing " They passed ¹," Today on the day in front of us standing the most main from problems one This is our Republic. village on the farm science and of practice from each other far away , mostly in cases interrupted " it's the rest " words proof will find . Our President initiatives with current on the day village to the farm big attention is being addressed .

¹ Uzbekistan Republic The President's February 2017 " Republic of Uzbekistan" further develop according to actions strategy Decree No. PF-4847 " On

Village farm network developed world of countries almost all

economic development high to the peaks is achieving this. The main reason as village population prosperity level increase their various in the fields effective activity take to go very big positive impact shows them to the news aspiration encourages and such in case human capital strong competition under the influence high to indicators to achieve aspiration increases. Village farm network development on the network ecological clean products cultivation through in the country again work system to develop ground creates. From this outside village population for work places number to increase service does.

In Uzbekistan stable and effective the economy formation regarding done increased bride reforms today's on the day positive the results manifestation Including short time inside in the economy deep structural changes, population their income growth, population work with busyness increase, village farm working release reform to do, village in places small business and private entrepreneurship develop based on new work their places create, work with of employment various forms develop and other to achievements achieved.

Village labor market order to put it ², to put it digital technologies with equipment, information collect and analysis in doing equalize and comparison, statistical analysis, facts gathering, village in places new market on demand answer giving enterprises create and the population work with provide such as deep issues today's on the day seeing is being released.

Village in places population busyness increase for important measures complex requires a holistic approach. This is a rural farm from development pull industry, tourism, youth to work attraction to do, infrastructure to improve and social services expansion own inside takes. Of these all economic activity increases employment expands and village in places resident population for new opportunities creates.

Current in case one how many hectare lands own harvest showing, new technologies village on the farm big achievements take is coming and their work All businesses ³ new techniques with fast and good quality products working is issuing and quality at the level edge from the state unstoppable product working Newly digitized economy during new computers the product advertisement to do and to sell accelerating, modern techniques and the product modern packaging or beautiful and good quality as working to release help is giving. Noting that transition must digital economy village farm in the enterprise not, maybe whole world work It's

making things easier , man. labor is being made easier , hard physical labor instead of light hand finger through modern techniques are being carried out . These are all of course good in time to live evidence gives .

In Uzbekistan population marriage of well-being promising forecasts , economic growth pace , employment provision , income distribution justice , health storage and education in the system reforms and social protection system to strengthen related . With this together , state by done increasing complex reforms , economic and social stability to provide help gives . Population marriage well-being increase for in the country economic and social politics harmony necessary .

Economy of the republic and population employment issues serious importance has is , in the future employment forecast economic stability provision , social prosperity increase and labor from resources effective use point of view from the point of view important . Uzbekistan village regions economic in development and population of employment in improvement important place Village in places population busyness increase , especially in rural areas agriculture , agro- industry complexes and services in the field effective work their places create through done is increased .

Village in places population busyness increase prospects one how many networks to develop related . Village agriculture , agro-industry , small and middle business , tourism , digital technologies , professional education and infrastructure development through village in places new work places create and population busyness improve possible .

Highlight okay today's on the day users food to their products order to give Telegram bots for active are using this of course village It is also used in places . various online stores , electronic payment systems are also active developed This village is on the farm being cultivated products fast to sell and of workers fast monthly their income to get big contribution is adding . Because everyone in places too modernization much their work facilitates . Village in places population work with is being provided and working being released things world It is also being released on the market , so at the bottom modern technique and of technologies development It's okay .

Conclusion as to say maybe , Village population for subsidies , loans and grants such as financial support systems create such as promising strategies in use population marriage well-being increase for previously being pushed large investment projects and state programs successful done if increased , this economic growth provide and village population for new work places in creation important role plays .

How many how much new technologies people his life making it easier . Village on the farm cotton to plant , to sow picking to take , to thread convert or fabric working release all their work modern technologies having done workers work It's making it easier . village in places enterprises is opening because new In Uzbekistan digital economy period city with village between the difference take threw , how much how much village places prosperous to be , to the people , the population work with is providing .
