Abstract: This in the article abroad , including Singapore in the economy investments attractiveness increase roads studied . Economics investments attraction to do according to world from practice come out , state clear and stable legislation base create need , investment activity special competent organs in person , first next , the state by order of the place relevant system working exit need statement With this together , talents attraction to do and to them conditions create to the issues attention focused .

Key words : investment , investment attractiveness , foreign investments , production issuance , legislation , investment activism , corruption , economic environment , technological innovations .

Singapore not only city , maybe whole world along entrepreneurs attraction global business that does The company 's headquarters In Singapore to work download-advanced laws and comfortable economic environment because of process It's getting easier .

Singapore's economic development history unique and inspiring . In the early 19th century Britain of the empire colonialism reign during small trade port as started Singapore his/her own strategic from the location East and West between sea trade roads at the crossroads using transit of trade important to the point became .

In 1965 to independence from what has been achieved since Singapore many heavy to difficulties face it came , that's it including natural of assets shortage , unemployment increase and social prosperity to the problems against struggle . Nevertheless , the first Prime Minister Lee Kuan Yew oh strategic leadership under country every one-sided modernization to do aimed at change started . Singapore economic openness policy announcement did , foreign hand capital active attraction did and industry development , technological innovations and education standards to increase money sewed .

Singapore strategic course , also revolutionary education initiatives through human to resources investment input , commerce competition for comfortable environment create , regional headquarters and working release capacities organization to grow global companies for attraction to do and corruption in matters intolerance recognized the need .

This changes because of Singapore wide extensive foreign investments and high technological projects attraction to do successful it happened , this and the country of the world main financial from the centers one status with completed fast economic rise to the wave take came . Present Singapore every one to someone correct coming income indicators with separated stands , innovations in the field leader place occupies and international corporations wide circle for main is the basis .

Political stability , foreign capital attraction to do advanced policy and on the planet the most competitive corporate tax from rates one Singapore of the world various from the corners arrived businessmen and investors for the most attractive directions in line when entering continue is doing .

Modern Singapore West and East referee between and binder task global economic on the field active This is a unique place where global business one row determinant factors because of expansion and innovations for endless prospects open gives :

1. Geoeconomic Advantage : Asia-Pacific ocean basin in the center located strategic location because of Singapore this dynamic in the region own position wants to strengthen was organizations for perfect SpringBoard task will do .

2. International integration : Singapore two one-sided and many one-sided trade of contracts wide network through various countries with economic connections to strengthen big attention focuses and this with to enterprises international to the markets straight away entrance opportunity gives .

3. Advanced tax system : worldwide the most competitive corporate to tax pull from the levels one and various kind operations for tax of privileges wide to the arsenal has was Singapore on the global stage business for the most attractive from places is one .

4. Technological in terms of developed Infrastructure : Singapore of enterprises effective and continuous performance provide for transport, communication , financial services and high technologies areas own inside received infrastructure intense to develop focused .

5. High qualified personnel : education and professional preparation high standard with Singapore to companies many eloquent , educated and to the worldview based from experts use opportunity gives .

6. Intellectual capital protection to do : country patent, copyright right and brands solid protection guaranteeing hard intellectual property to the legislation has .

Singapore West and East between binder is the global economic on the field important is a participant . He is a strategic location , international trade relations , competitive tax system , advanced infrastructure , high qualified worker power and intellectual property protection with business for attractive center These factors are him/her companies for innovations and expansion for comfortable to the environment turned and human capital to develop achieved .

Singapore from experience come out , people in Uzbekistan too capital develop for following important in directions work take to go Talents attraction to do and to them conditions create . This for high qualified experts for comfortable labor environment create , age experts support programs on the road to put Innovative the ecosystem development . In this startup and entrepreneurship support , innovation grants for projects and subsidies separation , large IT parks and technoparks organization to grow through achieve possible . With this together , intellectual property protection to do and scientific research support their work acceleration . Patent and authorship rights protection to do system reinforcement , scientific research and developments commercialization encouragement with known to the results is achieved . Implementable affairs quickly result even if it doesn't , but in the future high potential of personnel projects whole world - renowned ideas to the formation reason will be . Of these all human capital intense to develop and Uzbekistan in the global arena competitive to be service does .
